

Regime Beta Agents: Buy, Sell, or Hold Decision Flow

Current flow after IBKR paper execution, signal-quality, cross-agent diversification, and per-agent model changes.

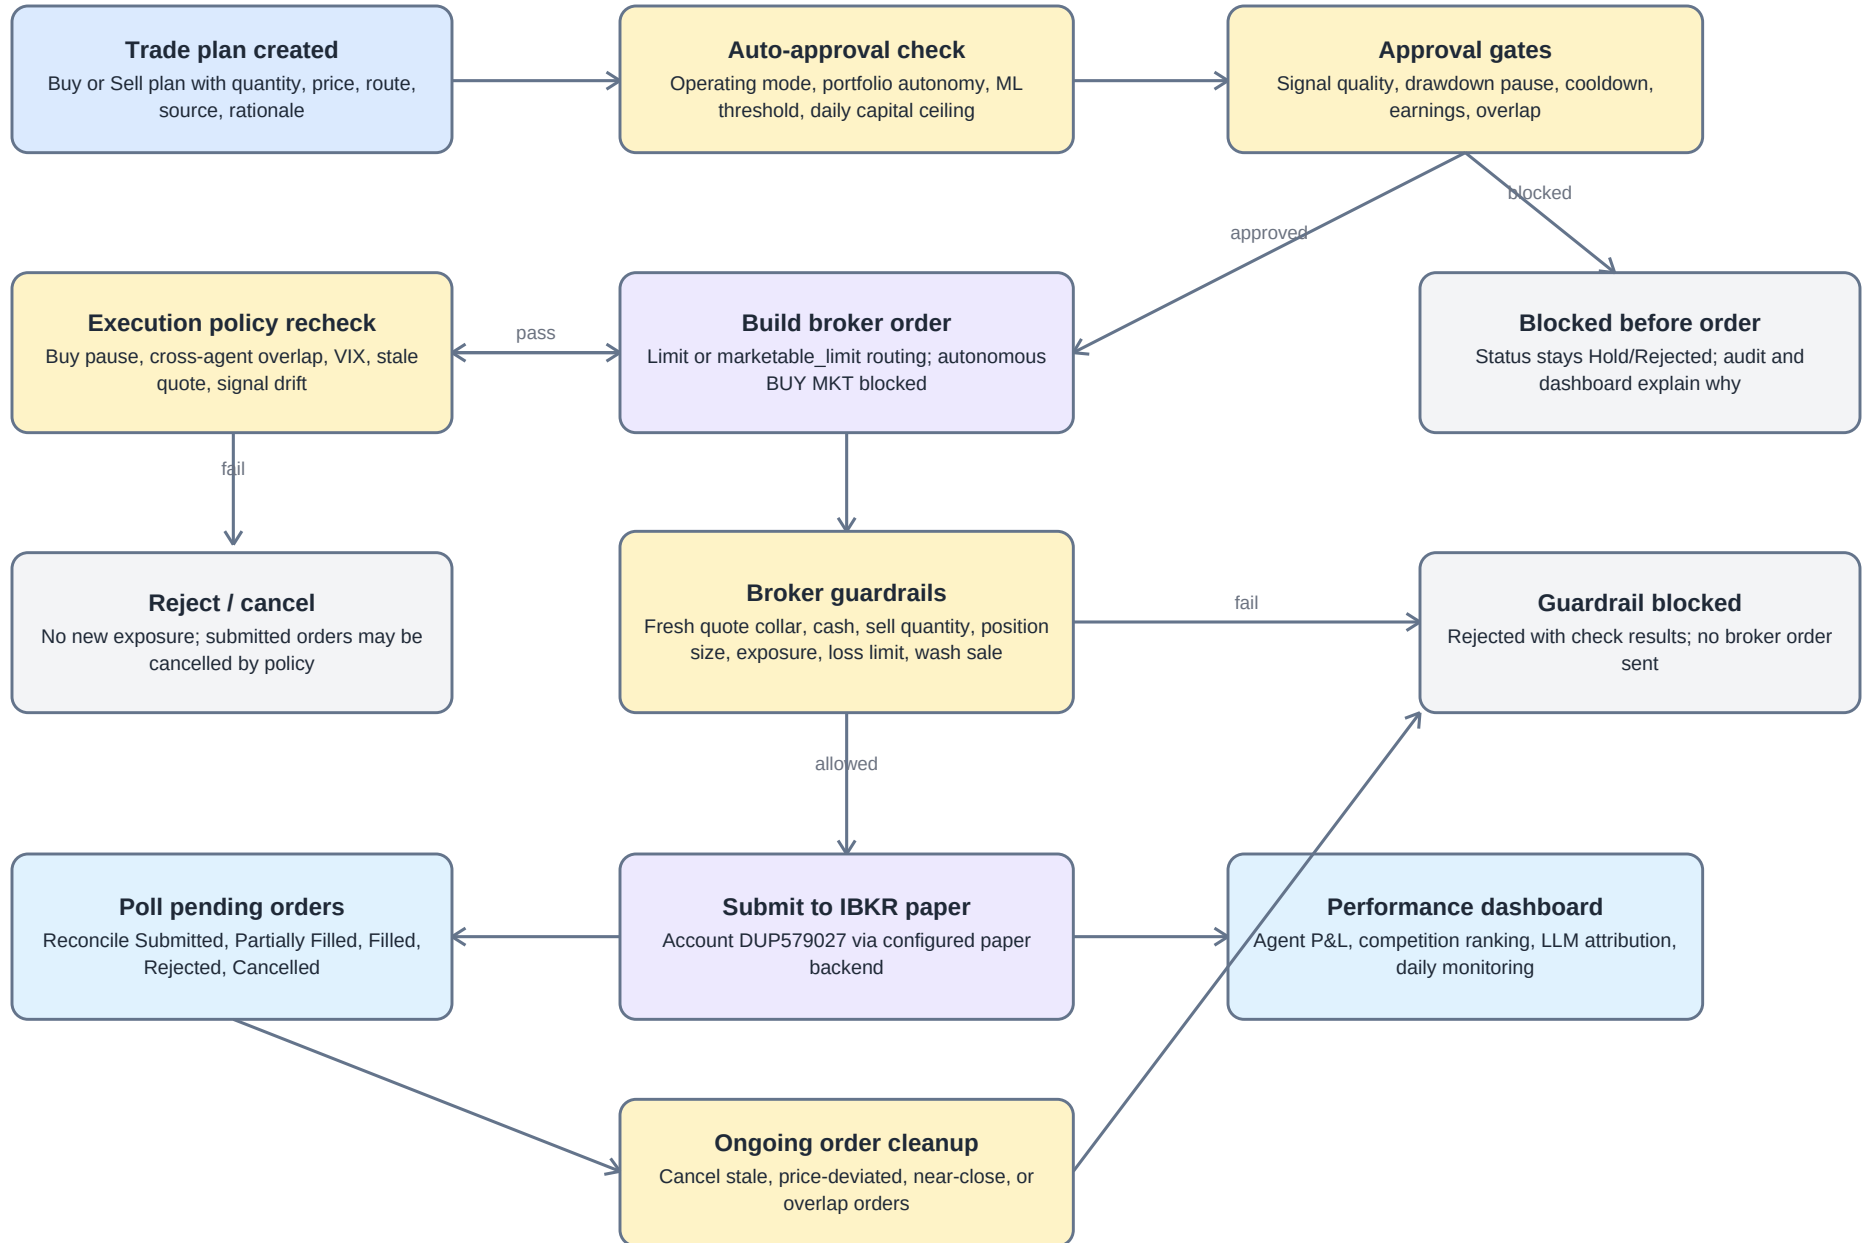

Buy/Sell plans that pass continue to approval and execution on Page 2

Code refs: `scheduled_runner.py`, `paper_trading.py`, `signal_quality.py`, `agent_policy.py`

Approval, Broker Guardrails, and IBKR Paper Execution

A trade plan is not an order until it passes auto-approval, execution policy, and broker guardrails.

Per-Agent Model Selection and LLM Attribution

LLM output can confirm, review, or veto a signal; every influenced decision records provider/model attribution.
